

# Software Engineer – Backend

## Berlin, 80-100%

We are seeking a highly skilled Backend Engineer with a strong passion for software architecture and development, particularly in Generative AI solutions. You will contribute to advancing our FinanceGPT solution—a cutting-edge tool designed to enhance operational efficiencies for top-tier companies in the Financial Services Industry. This role offers the opportunity to work at the intersection of finance and AI, directly impacting the future of financial technologies.

### Key Responsibilities

- Design and implement scalable, secure, high-performance architectures for our SaaS product in the Generative AI space
- Collaborate with Product Managers, UI/UX Designers, and stakeholders to deliver exceptional customer value
- Transform complex requirements into robust and secure software solutions
- Deliver high-quality code with frequent deployments
- Participate in peer code reviews, retrospectives, and continuous improvement processes
- Optimize database performance and manage microservices at scale
- Focus on delivering end-to-end value for customers

### Your Skills and Experience

- Extensive hands-on experience with Node.js and NestJS
- Expert-level knowledge of PostgreSQL and Prisma ORM
- Proficiency with CI/CD tools such as GitHub Actions, Docker, and Kubernetes
- Experience in building and managing scalable microservices
- Effective communicator, fluent in English, both written and spoken
- Collaborative problem solver, skilled in working with multidisciplinary teams
- Nice to have: Experience with LLM APIs such as OpenAI or Mistral and Generative AI applications and familiarity with monitoring tools like Loki and Prometheus

### What We Offer

- Opportunity to work on innovative projects in the Generative AI space
- Access to a state-of-the-art tech stack on the Azure ecosystem
- Chance to shape the future of financial technology with a leading SaaS product
- Inclusive culture with flat hierarchies that values independence, creativity, and transparency
- Flexible work environment, offering remote work options

- Collaboration with great colleagues in an inclusive, neurodiverse-friendly environment

**Who we are**

We at Unique build a highly secure generative AI platform called Unique FinanceGPT, tailored for the financial sector. Utilizing GPT technology, we aim to revolutionize how enterprises manage their workload by offering automated solutions. Our mission is to simplify and optimize business interactions, negotiations, and partnerships in the finance sector.
